

Genesis™ Windows and Doors

The more you look...

Hinged Doors

So you're a home owner with a busy lifestyle, work commitments, a family to look after. You may also be building or renovating which means you are trying to fit it all in.

The good news is that Genesis™ windows and doors have been designed with a unique aluminium frame, allowing different products to be integrated together throughout your home saving you time and money.

Genesis™ windows and doors feature an exclusive design of clean visual lines, curved features and rounded edges.

The suite features high quality hardware and components, ensuring reliability now and into the future.

The Genesis™ suite has also been acoustically tested and rated to comply with new energy rating codes.

And the added bonus is that Genesis™ windows and doors are easier to keep clean than traditional residential window and door suites. The products have fewer cavities and grooves so less places for spiders and dust to accumulate; an ideal solution for any busy household.

Genesis.™ The hinged doors you've been looking for

Well worth looking into...

GENESIS™ HINGED DOORS

FEATURES INCLUDE:

- An 'open out' configuration. This is ideal in situations where opening your door in, rather than out, would interfere with your household furniture.
- Hinges that have been developed using smart hinge® technology which can be adjusted throughout the life of the door.
- A double door configuration that makes the opening similar to a French door. Shoot bolts can be installed to hold the non-active door in a secure position.
- The option of installing glass panels above or beside the hinge door (high lights or side lights) using the same aluminium frame that is used in the manufacture of the door.
- The option of aluminium panels instead of glass. You can choose from a wide range of styles and colour options that best suits your home (see below).

Other Genesis™ features include:

- Tight seals are incorporated into the door to reduce the transfer of air and noise.

- Hinges that have been developed using smart hinge® technology which can be adjusted throughout the life of the door.

- A number of locking options are available including a multi-point lock that secures the door at top, middle and bottom.
