

The more you look...

Genesis™ windows and doors feature an exclusive design of clean visual lines, curved features and rounded edges.

Sliding Windows

Genesis™ windows and doors have been designed with a unique aluminium frame, allowing different products to be integrated together throughout your home. The suite features high quality hardware and components, ensuring reliability now and into the future.

The Genesis™ suite has also been acoustically tested and rated to comply with new energy rating codes.

For the time conscious homeowner, Genesis™ windows and doors are easier to keep clean than traditional residential window and door suites. The products have fewer cavities and grooves so less places for spiders and dust to accumulate; an ideal solution for any busy household.

Some products feature effortless motion technology (emt™), so choosing from the Genesis™ range of windows and doors ensures you've chosen a product with superior technology.

The Genesis™ suite is available in an extensive range of colours and finishes to best suit your home and décor requirements. Choose from a wide selection of powder coated, anodised or even our exclusive wood grain finishes.

Genesis™, the sliding windows you've been looking for

Well worth looking into...

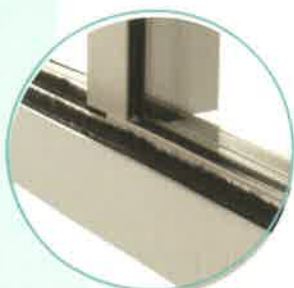

GENESIS™ SLIDING WINDOWS

FEATURES INCLUDE:

- A window which closes quietly due to the inclusion of a rubber 'bulb seal'.
- An anti lift block. This ensures the window cannot be lifted out of the track once it is closed.
- A facility to have your security or flyscreens fitted to your sliding window during the initial installation or at a later date.
- The option of multi stack configurations, where all panels slide together, providing a large open space for ventilation and airflow into your home, is available. Three, four or six panel configurations are available. This is an ideal solution for a window overlooking a beachfront, a deck area or any location in your home where you would like to enjoy your surroundings.

Other Genesis™ features include:

Tight seals which prevent air leakage and allow homeowners to better control the climate in their homes.

A window has been designed to minimise the appearance of metal around the frame. Most of the functionality of the window is concealed in the frame.

High quality hardware to ensure the opening and closing operation is smooth and effortless. The window can hold large glass panels weighing up to 60 kg without affecting the smoothness of the operation.

A window which is fitted with a unique key window lock. This lock has a special feature that engages the window at a secure open position of 100 mm. To allow a permanent and secure opening position.

Genesis™ will open up your eyes
and your home

Genesis™ Windows and Doors is a joint project between
Capral Aluminium Limited (ABN 78 004 213 692) and
Crane Aluminium Systems (ABN 80 088 099 861).
