 DécorSatin™ Mirror

High reflection and environmentally friendly

Description

Viridian **DécorMirror™** offers a brighter, environmentally friendly mirror for the future. DécorMirror is the successful culmination of extensive design and testing to bring to the market a world class innovative product that provides very high light reflection. It is a high specification mirror which incorporates excellent protection of the reflective silver coating without the need for the copper layer used in conventional mirror processes. This is not only environmentally friendly but provides greater resistance to natural corrosion, so minimising the unsightly problems of black edges and spot faults. DécorMirror is also provided with two coats of special backing paint which gives additional protection from steam, moisture and chemicals.

Viridian **DécorMirror Safe™** is one of few mirrors that comply with AS/NZS2208 for Grade A safety glazing materials. The mirror is backed with a special vinyl film. For doors and high activity areas, DécorMirror Safe is recommended and should be glazed in accordance with Australian Standard AS1288 and New Zealand Standard NZS4223.

Viridian **DécorSatin™ Mirror** combines the best features of **DécorMirror™** and **DécorSatin™**, making it a high quality decorative product perfect for interior applications. The silver coating creates a unique and appealing metallic finish with a diffused light reflection, without being spectrally reflective. It is also available in vinyl back.

DécorMirror can be edge worked – this includes bevelling and 'brilliant' cut designs.

Installation

There are many techniques that can be used to install mirrors, from framing to adhering directly to a door or wall. The adhesive to be used must be checked with the manufacturer for compatibility with DécorMirror paint or vinyl backing. It is also recommended that the adhesive only be applied in vertical strips.

One way vision

For observation areas, use Viridian **DécorMirror™ Venetian** where the coating is applied in stripes. Also refer to Viridian **Observa™** for more information on discreet observation options.

Cleaning

Some cleaning solutions can damage the mirror coating. Mild detergents are recommended.

Features and benefits

- ◆ High light reflection of 92% in 4mm
- ◆ Higher corrosion resistance than conventional copper backed mirrors
- ◆ Improved resistance to cleaners and adhesives
- ◆ DécorMirror Safe is available as a Grade A safety product

Maximum size			
	DécorMirror	DécorMirror Safe	DécorMirror Venetian
3mm Clear	3660 x 2440	NA	NA
